

Preferred Drug List (Expanded)

Your prescription benefit provides you and your doctor with many choices. Understanding them will help you make informed health care decisions. It will also enable you to ask your doctor or pharmacist the right questions about your medication needs. We want to make sure you have the information you need to make the best choice for you.

What is a Preferred Drug List (PDL)?

A PDL is a list of prescription medications chosen for their clinical value and cost-effectiveness by an independent panel of physicians and pharmacists. With our PDL, you and your doctor have the freedom to choose the medication that works best for you. Since there may be more than one drug available for your medical condition, we encourage you to use generic and preferred brand-name drugs whenever possible to help manage your prescription costs.

NOTE: The PDL is subject to change without notice at any time during the year without prior notice to members or physicians. For updated PDL information, use the Preferred Drug List search tool on our Web site or call 1-888-963-7290.

Should I use generic drugs?

Absolutely! Generic drugs become available when patents expire on brand-name drugs. They contain the same active ingredients as brand-name drugs, but are not manufactured under a brand name or trademark. The color and shape of the generic drug may be different from its brand-name counterpart, but the active ingredients are the same for both. Generic drugs must meet the same Food and Drug Administration (FDA) quality standards as the brand-name drugs. You should always ask your doctor to allow a generic substitution if one is available. When you use a generic drug, you get the same quality as the brand-name drug — at a lower cost.

What is a 3-tier benefit?

(Most employers offer a 3-tier benefit plan. Refer to your group benefit booklet to see if this applies to you.) Medications in a 3-tier benefit structure are divided into three tiers — Tier 1, Tier 2 and Tier 3. Each tier is assigned a copayment or coinsurance amount, which is the amount you pay when you receive a prescription. Refer to your benefit document to find the amounts that apply to you. Tier 1 drugs are generic drugs. Tier 1 drugs in this document are in lowercase letters. For the lowest out-of-pocket expense, you should always consider Tier 1 drugs if you and your doctor decide they are appropriate for you. Tier 2 drugs are preferred brand-name drugs. Tier 2 drugs in this document are listed in all capital letters. Consider Tier 2 drugs if no

Tier 1 drug is available to treat your condition. Tier 3 drugs are non-preferred and will usually cost you more. If you are using a Tier 3 drug, talk to your doctor about Tier 1 and 2 drugs that may be appropriate for you.

NOTE: When a generic becomes available, most of the time the brand-name drug will automatically move to the 3rd tier.

What is a specialty drug benefit?

A specialty drug benefit requires that you pay a different amount (copayment) for specialty drugs, no matter what the status is of the drug on our PDL. If you have a specialty drug benefit, you will pay the specialty drug copayment or coinsurance under your plan for specialty drugs, whether or not you receive a generic, preferred brand or non-preferred brand drug. Refer to your benefit document to find the amounts that apply to you for specialty drugs.

What if my drug is not listed on this Expanded PDL?

This is an alphabetic listing of commonly prescribed drugs on our PDL. If your drug is not listed, it may well be that:

1. Your drug is a generic and all generics are considered preferred drugs,
2. Your drug is not a preferred drug and is available at the highest copayment or coinsurance, or
3. Your drug is preferred but is not included in this list. To look-up a specific drug, use the Preferred Drug List search tool on our Web site, or call 1-888-963-7290.
4. There are a few drugs for which your doctor may need to request prior authorization from us before you can fill the prescription. This is to make sure your benefit plan covers the drugs. Click on the "Prior Authorization List" link on our Web site for more details.
5. Your drug is available over-the-counter or is excluded from coverage. For many conditions, an over-the-counter medication may be the most appropriate treatment. Talk to your doctor about over-the-counter alternatives. They may be a good choice for you and may cost you less.

Please Note

- Keep in mind this list is subject to change.
- Your benefit document defines your actual benefit and may exclude coverage for certain drugs listed in this booklet.
- Some drugs have quantity limits on them. This means you only can receive a limited amount at one time or during a specific time period. Your pharmacist can tell you if your benefit plan applies any limitations to your prescriptions.
